Saves | Visual Design, Front End

geniuskitchen.com / foodnetwork.com / iOS / Android

Multiplatform redesign and refactor of previous "Recipe Box" webapp, which allows users to save and organize recipes.

Genius Kitchen | Visual Design, Front End

food.com => geniuskitchen.com

Rebrand and relaunch of Food.com to Genius Kitchen (GK), a cooking and food entertainment micronetwork.

GK Front End Library | Visual Design Lead, Front End

geniuskitchen.com

A web-based design & engineering resource containing specs, UI patterns, code templates, and guidelines for GK enhancements. Personally built and maintained.

Enhanced Search Experience | Visual Design Lead, Front End

food.com

Reconceptualized search experience with emphasis on intent, rather than literal matches.

Recipe Page Activity Feed | Visual Design Lead, Front End

food.com

A major overhaul of the comments section on recipe pages. The new activity feed allows for multiple post types including photos, questions, tweaks and reviews. Also added "Like" functionality and inline replies.

Smart Content Collections | Visual Design Lead, Front End

food.com

Modularized content templates; a "Medium" view for editorial promotion, with larger images and more information than standard search results.

"Responsive" Newsletter templates | Visual Design

food.com

A new series of email-friendly newsletter templates using tables to adjust content based on available real-estate.

Food.com Responsive Redesign | Visual Design, Front End

food.com

Complete redesign & refactoring of Food.com, utilizing Mobile-First and Responsive/Reactive web design principles. Also created ad-hoc companion style guide utilizing bootstrap

Recipe Box Webapp | Visual Design

food.com / foodnetwork.com

A cross-site webapp allowing users to save and organize recipes (public, private and limited 3rd party) and create private notes.
